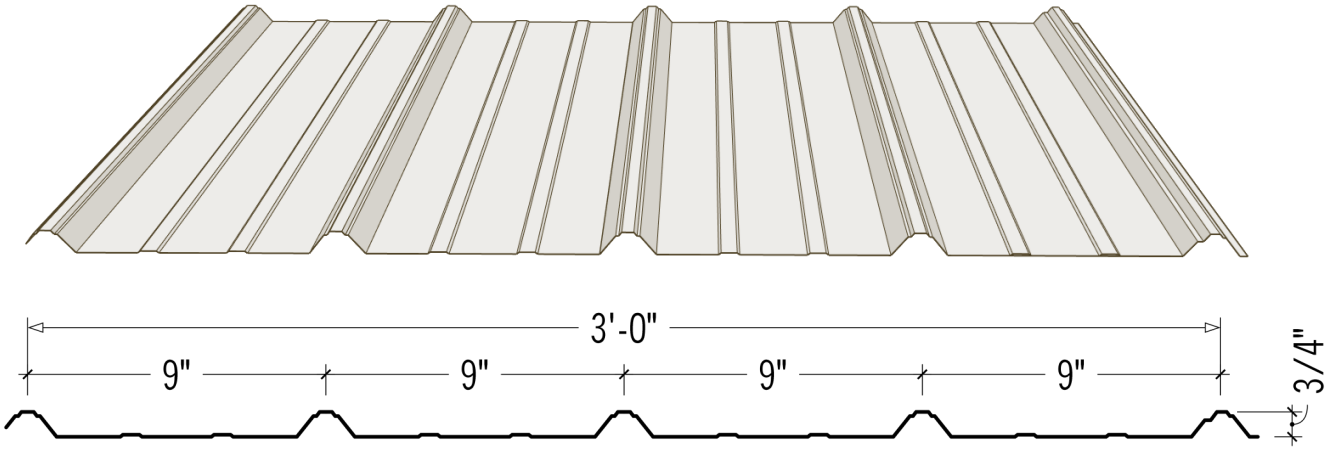
TUFF RIB

Metal Roof & Wall Panel



Tuff Rib is a classic exposed-fastener metal panel proven to deliver dependable performance, versatility, and lasting value. Designed for roofing, siding, and interior liner applications, Tuff Rib is well suited for agricultural, residential, and commercial buildings. Tuff Rib can be applied over open purlin framing or solid sheathing. Each panel is custom produced to the exact lengths required for your project, with lengths available up to 40 feet, helping reduce waste, minimize field cutting, and streamline installation. Available in a variety of colors and finish options, Tuff Rib can be paired with color-matched trim and fasteners to create a clean, professional appearance built to last.
